*The Visionaries of the Mediterranean Renaissance imagined a world where art... architecture... nature and man came together to create an ideal existence... At Lake Las Vegas Resort we see that world as well. A hillside masterpiece with dramatic views of a sparkling lake, rugged mountains, championship fairways and a market place reminiscent of 15<sup>th</sup> century Florence. A place with classic landscaping, stunning water features and scenic outlooks for stargazing. A level of elegance that one could expect from such a magnificent location. A work of art inspired by the masters for today's visionaries.*

*The ambiance is derived from a beautiful combination of Northern Italian lake region charm and the casual elegance of Tuscany. Quaint streets lead you to piazzas where you might enjoy a refreshing gelati or a streaming cup of cappuccino while you watch gondolas and water taxis on the lake. Days here might be spent browsing the specialty boutiques, exploring open-air markets or wandering through an art festival. Championship golf courses by Jack Nicklaus, Tom Weiskopf and a planned Fazio Designed course challenge golfers with terrain that varies from the mountainous landscape to the desert floor. A concert on the floating stage could be the romantic backdrop to an intimate dinner at one of the fine waterfront restaurants. And if all these are not enough to fill your evenings, the myriad of stars in the clear desert sky are sure to entertain you with a dazzling show as you wander back to your home.*

*This is the story of Lake Las Vegas Resort.*
